GrowthAllocation

one update · static order, not elapsed time

	Computation	model code / *Cropbox action* / tags
4	supply	*update field*
5	gain	r; r = supply.rate
6	share	*call · bound inputs*
7	root_rate	share(0.3)
8	mass	*accumulate*
9	mass	gain *accumulate · save rate*

read · bound input · value (right) · rate (left) · variable guide

fading ends: read above from the previous update; save below for the next

accumulate: add previous rate × elapsed time
